

Architect First Meeting Scan Decisions

Decision Summary

This applies the agreed cleanup to the `Book Mar 4, 2026` architect-meeting cohort.

Decision policy:

- Keep substantive inspiration pages in the architect briefing subset.
- Exclude blank/separator pages.
- Exclude editorial, cover, and reference pages that are not primary inspiration content.
- Preserve all original assets in the database for provenance; exclusions are cohort-specific, not global deletes.

Collections

- Original raw cohort retained: `Cohort: Architect First Meeting - Book Mar 4, 2026`
- Cleaned working cohort: `Cohort: Architect First Meeting - Book Mar 4, 2026 (Cleaned)`
- Excluded pages cohort: `Cohort: Architect First Meeting - Book Mar 4, 2026 (Excluded)`

Corpus Representation Reminder

These collections are review artifacts, not the final corpus document structure.

- Single-page scans should end up referable in the corpus as standalone documents.
- Multi-page scans should end up referable in the corpus as one logical document per original clipped item.
- For this PDF, the current importer stored every page as a separate page-level asset because blank-sheet delimiter detection did not recover the intended multi-page grouping.
- The kept/excluded collections are therefore a cleanup layer on top of the page assets, not the final document model.
- A later regrouping pass should restore the expected 4-5 multi-page document units once their page boundaries are confirmed.
